

## DC Voltage Sensor CYVT01-xnU0

The **CYVT01-xnU0** DC voltage sensor/transducer works according to Linear Photoelectrical Isolation and is designed for applications to measurement and monitoring of DC voltage. The output signal (DC voltage or current) of this transducer is proportional to the input DC voltage. They are suitable for measurements and long time monitoring of DC voltages and can be applied to power supply management, DC motor drivers, battery chargers and systems etc.
